

FIRSTKI ADITYA FERNANDA

+6282229231664 | adityafernanda2013@gmail.com | <https://www.linkedin.com/in/firstkiaditya/>

Final-year Information Systems student with a strong foundation in software engineering and a dedicated focus on cybersecurity. Experienced in backend API development, system hardening, and building secure web applications. Passionate about offensive security, red teaming, and threat analysis, with hands-on experience in capture the flag competitions and mentoring peers through lab-based teaching. Actively transitioning into the cybersecurity field by deepening technical expertise in DevSecOps, vulnerability assessment, and attack simulation. Eager to contribute as a Cybersecurity Intern by leveraging both development and security skills to support real-world security initiatives.

Education

Telkom University - September 2022 - Now

Bachelor Information System

- 1st Winner AI Hackathon AIYES University.
- 3rd Business Plan by Accountant Information System.
- Winner of The Best No Code Hackathon by Garuda Hacks 4.0.
- 10 Finalist AI For Accessibility Hackathon 2023 Internal By Microsoft and Telkom University x Fakultas Informatika.
- Winner: Best Performance Hacking Program Innovation 1.0.

Work Experience

Enterprise Infrastructure Management - September 2024 - Present

Competition Division Staff, Contract

- Collaborate with cross-functional teams to develop and implement strategic plans that align with Enterprise Infrastructure Management goals.
- Create event data-related competitions, whether related to networking or not, and distribute them to EIM members.
- Mentored EIM members on topics including network security, basic ethical hacking, and threat analysis.
- Developed and delivered internal cybersecurity workshops and CTF-style challenges.
- Created strategic cybersecurity competition material aligned with the team development goals.

Sistem Jaringan Laboratory - September 2024 - Now

Assistant Practicum, Contract

- Leading practical work for 3 classes and guiding 7 to 9 students per class.
- Creating an introductory module on computer networks, especially crimping.
- Develop and administer practical assessments.
- Maintain course material and resources for the Sistem Jaringan course

Jagoan Hosting - Januari 2025 - Maret 2025

Cybersecurity Mentor, Contract

- Delivered Cybersecurity training sessions for students and beginners, covering secure web practices,

ethical hacking tools, and hosting or server vulnerabilities.

- Facilities include lab-based exercises to simulate real-world web security scenarios.

Ngalup Collaborative Network - Januari 2025

Guest Speaker, Contract

- Delivered a public talk titled “Fundamental Firewall Implementation Beginners” to IT Enthusiasts and students.
- Explained the role of firewalls in modern cybersecurity defense, configuration basics, and common attack scenarios.

Project

Secure Web Application Development, Backend Developer

- Develop a secure web application using Node.js and MongoDB, implementing best practices for security, including input validation and data encryption.
- Created RESTful APIs for user authentication and data management, ensuring secure communication through JWT (JSON Web Token) for user sessions.

Capture The Flag Competition, Team Member

- Participated in a capture the flag competition organized by Fakultas Teknik UGM, focusing on solving security challenges related to web vulnerability, cryptography, and network security.
- Collaborated with team members to develop strategies for tackling various challenges, enhancing problem-solving and teamwork skills.

Additional Information

Hardskills: Linux, Firewall, JavaScript, Python, PHP, Databases, Java, MySQL, NoSQL

Soft skills: Public Speaking, Team Work, Problem Solving, and Creativity

Achievement: 1st Place in AIYES Hackathon 2024, 2 Place in CR-YOUTH Hackathon, 3 Place in Business Plan Competition by Accounting Information System Telkom University, The Best No Code Garuda Hackathon, The Best Performance Winner Hacking Program Innovation 1.0, 2 Place in LKS Cyber Security, 4 Place in LKS Cyber Security. Finalist of Capture The Flag by Fakultas Teknik UGM
